

PENTAR KLOFT RETARDER, is dedicated to the design, manufacture and marketing of electromagnetic brakes for all types of industrial vehicles and industrial machinery. We have more than 25 years of experience in the sector and export worldwide.

PENTAR KLOFT RETARDER, It is authorized by leading vehicle manufacturers and operates worldwide, exporting retarders to more than 20 countries with excellent results.

Our difference is the customization of the product tailored to our customers. We do not intend to compete with large multinational serial productions.

Pentar's high quality standards, features and safety make a difference to our competitors. Our products do not need maintenance.

To achieve these high levels of quality, Pentar has implemented a quality system according to the standards of the European Standard **UNE EN ISO 9001: 2015** and is committed to:

- ✓ Design the safest and most effective products for the client.
- ✓ Analyze the risks and opportunities of all our processes, establishing effective actions in each case, to achieve continuous improvement in all of them.
- ✓ Comply with the applicable legislation in each country where we market our products.
- ✓ **Train and inform our staff to achieve maximum efficiency in our work.**

PENTAR KLOFT RETARDER, undertakes to review this policy periodically and adapt it in each period.
